Profile

Front-End & Immersive Experiences

Senior front-end developer with 10+ years building websites for watchmaking and luxury brands and the immersive, real-time 3D experiences that go with them.

Experience

Senior Front-End Developer

Merkle Switzerland
Geneva

Oct 2014 → Dec 2026

- Joined as a front-end consultant and became senior front-end developer and mainly worked on luxury watch brands.
- 2022–2024: Emerging Experiences team, R&D in 3D, Unreal Engine, Unity and AR/VR. Since then, 3D proofs of concept for client pitches.
- Built the front-end architecture of Vacheron Constantin's website, still in use two redesigns later and reused for Baume & Mercier and Audemars Piguet.
- Technical direction, code reviews and mentoring on small front-end teams (Audemars Piguet, Vacheron Constantin, Baume & Mercier).
- Link between designers, clients and back-end teams, finding ways to build demanding designs within CMS constraints.

Expertise

Front-End

Vue 3 / Nuxt · Astro · TypeScript · Modern CSS · Accessibility - WCAG 2.2 · Design Systems & Tokens · Headless CMS · GSAP · Vite - Node.js - CI/CD · Code Review & Mentoring

3D & Creative

WebGPU / WebGL · Three.js · React Three Fiber · Shaders - TSL / GLSL · PixiJS · Unreal Engine · Blender

Selected client projects

Chopard
3D Viewer
3D Development & Asset Pipeline

The client's 3D models came in mixed formats and sizes. Wrote a Blender + glTF-Transform pipeline to process 60+ watches in batch, down to around 6 MB each. Built the three.js viewer, ready to plug into the CMS, with custom shaders for the diamonds and physics for the moving parts.

Devenir
Brain-controlled game
Unreal Engine Development

Unreal Engine game played with the mind, using an Emotiv brain-computer interface headset as the controller. Built the game and connected it to the Emotiv API (via Socket.IO) in two months for Digital Festival Zurich, later shown at OMR 23.

W3 Best in Show - Webby People's Voice

Audemars Piguet
Musée Atelier & brand site
Front-End Lead & 3D Development

Two sites sharing one style guide: the Musée Atelier website, with a homepage animated in three.js, and the main brand site. Worked with the designers on the 3D parts and adapted them to the constraints of the CMS.

Vacheron Constantin
Front-End Architecture

Set up the front-end architecture of the brand site. It's still in use two redesigns later, and was reused for Baume & Mercier and Audemars Piguet. Earlier, built heavily animated single-page experiences for new watch and collection launches.

Hublot
Strap configurator
Front-End Development & Maintenance

Vue.js app for configuring watch straps, integrated with Hublot's Magento e-commerce. Built it, then maintained it over time.

Education

Master's Degree, Information & Communication
INGÉMEDIA, Toulon - 2011–2013

Professional Bachelor's, Multimedia
IUT Le Puy-en-Velay - 2010–2011
